

Amendments to the Claims:

This listing of claims will replace all prior listings of claims in the application.

Listing Of Claims:

Claim 1 (**currently amended**): A wireless communication system comprising

a base station; and

a wireless communication apparatus,

wherein the wireless communication system resets transmission timing for retransmitting of a ~~control~~ an incoming call signal ~~transmitted~~ transmitted from the base station and addressed to the wireless communication apparatus in a case where a response signal in response to the ~~control~~ incoming call signal from the base station and addressed to the wireless communication apparatus is not received from the wireless communication apparatus.

Claims 2-4 (**canceled**).

Claim 5 (**currently amended**): A system according to Claim 1, wherein the base station resets the transmission timing in a case where the response signal in response to the ~~control~~ incoming call signal from the base station and addressed to the apparatus designated by an incoming call is not received.

Claims 6-7 (**canceled**).

Claim 8 (**currently amended**): A base station for controlling wireless communication with a wireless communication apparatus, comprising:

transmitting means for transmitting a ~~control~~ an incoming call signal addressed to the wireless communication apparatus; and

reset means for resetting transmission timing for retransmitting of the ~~control~~ incoming call signal addressed to the wireless communication apparatus in a case where a response signal in response to the ~~control~~ incoming call signal addressed to the wireless communication apparatus is not received from the wireless communication apparatus.

Claim 9 (**canceled**).

Claim 10 (**currently amended**): A computer program embodied in a computer readable medium for a base station comprising the programming steps of:

transmitting a ~~control~~ an incoming call signal addressed to the wireless communication apparatus; and

resetting transmission timing for retransmitting of the ~~control~~ incoming call signal addressed to the wireless communication apparatus in a case where a response signal in response to the ~~control~~ incoming call signal addressed to the wireless communication apparatus is not received from the wireless communication apparatus.

Claims 11-18 (**canceled**).

Claim 19 (**currently amended**): A base station according to Claim 8, wherein the reset means is configured to reset transmission timing when the response signal in response to the ~~control~~ incoming call signal addressed to the wireless communication apparatus designated by an incoming call is not received.

Claims 20-24 (**canceled**).

Claim 25 (**currently amended**) A method of transmitting a ~~control~~ an incoming call signal from a base station comprising:

transmitting a ~~control~~ an incoming call signal addressed to the wireless communication apparatus; and

resetting transmission timing for retransmitting of the ~~control~~ incoming call signal addressed to the wireless communication apparatus in a case where a response signal in response to the ~~control~~ incoming call signal addressed to the wireless communication apparatus is not received from the wireless communication apparatus.

Claim 26 (**canceled**).

Claim 27 (**currently amended**) A method according to Claim 25, wherein in said resetting transmission timing, the retransmission timing is reset in a case where the response signal in response to the ~~control~~ incoming call signal from the base station and addressed to the apparatus designated by an incoming call is not received.
